EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in communications with Michael Sachs on 23 January 2006.

The application has been amended as follows:

Claims 19-24 have been cancelled.

The following is an examiner's statement of reasons for allowance: The prior art made of record fails to show alone or in combination a safety system for explosive projectiles comprising an ionomer plastic cylindrical insert having threads on internal and external circumferences mateable on the external surface with a forward end of said projectile and further mateable on the internal surface with a fuze, wherein upon the occurrence of an unplanned thermal stimuli said insert will melt and either be expelled with said fuze or allow the projectile to vent gases that build up as a result of the raise in temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3644
